Evaluate Rotary Wing Surface Search Radar (SSR)

Mission Need: To employ advances in commercially available SSR in Coast Guard Rotary Wing aircraft to their maximum benefit.

**Project Objectives:**
- Evaluate commercially available SSR system for MH-60T or MH-65.
- Determine the best system for the CG.
- Model the system operating in a variety of environmental conditions and mission scenarios.

**Sponsor:** CG-711  
**Stakeholder(s):** CG-931

**Key Milestone / Deliverable Schedule:**
- Project Start: TBD
- Determine Best System: TBD+5 Mos.
- Model System: TBD+10 Mos.
- RDC System Demonstration: TBD+11 Mos.
- Project End: TBD+12 Mos.

**Expected Benefit:**
Improve operational performance/efficiency/mission execution/resiliency

**Notes:**
Scope not yet confirmed with CG-931 requestor (inquiries made).
