Existing Wrecks Potential Spill Response Assessment

Mission Need: Decision tools and recovery/mitigation tools for responding to oil in submerged wrecks.

Project Objectives:
- Develop decision making tools for Federal On-scene Commander (FOSC) to aid in response planning for oil in submerged vessels.
- Develop suite of hardware that can be used for assessment and mitigation, building on industry’s past efforts.

Sponsor: CG-5RI
Stakeholder(s): BSEE

Key Milestone / Deliverable Schedule:
Project Start .................................................. TBD
Tools Assessment........................................ TBD+7 Mos.
FOSC Tools Development............................. TBD+19 Mos.
Project End ................................................. TBD+31 Mos.

Project #: 2013.022  Tier: 3

Expected Benefit:
Improved Doctrine/CONOPs/TTPs

Notes:
