Upcoming Face-to-Face Sakai Training

What: Collaborate Ultra Showcase

When: Wednesday, October 24th

Where: Ingersoll 224

This brownbag meeting will showcase Blackboard's new web conference tool, Collaborate Ultra. We'll compare Classic Collaborate and Ultra side-by-side and discuss the advantages and limitations in the NPS and NMCI environment. I'll discuss features such as application sharing, recording, groups, polling, and technical issues such as accessibility and browser requirements. All are welcome but seating is limited. If there's interest, I'll be happy to repeat the session.

Please contact April Fertig at acfertig@nps.edu for more information.

NPS Online Video Tutorials

Have developed NPS Specific video tutorials on various subjects, listed below. It's recommended for instructors new to Sakai to review the first 4 for a Sakai introduction before viewing tool specific videos.

Previously created videos with copyright restrictions are still available on the NPS intranet at http://intranet/ITACS/cle/online_training.html. If you are not on campus, options for accessing the NPS intranet are available on the [Remote Access Page](#).

Other School's Online Tutorial Pages

The links below reference non-NPS web sites which may change, have different policies or use different tools. Please use these references for educational purposes only.
