

Connect to Collaborate with IOS

Follow the steps below to connect to a Collaborate session with a mobile device running Apple's iOS operating system.

Limitations

Only session participants should use the iOS app as not all Moderator functionality is available.

Collaborate Recordings will not play on iOS devices. Please watch recordings using a computer with Java installed.

Download the App

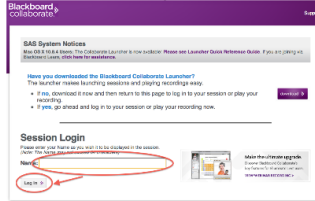

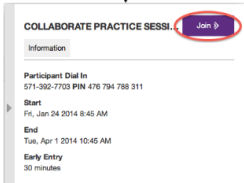

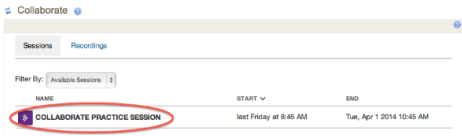

if you have not already done so, Download the [Collaborate App from the Apple App Store](#)

Testing

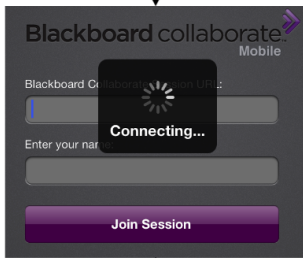

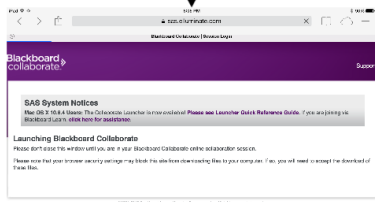

You can test your connection at any time by attempting to connect to the [Collaborate Always On session](#).

Sakai CLE

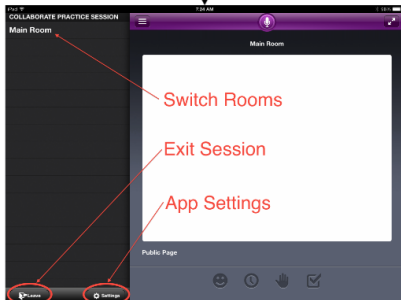

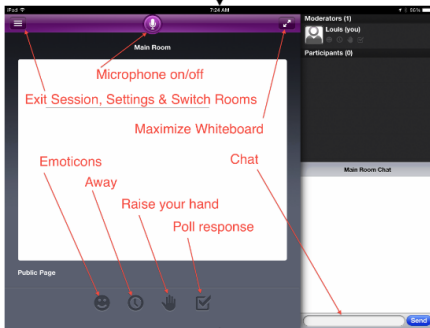

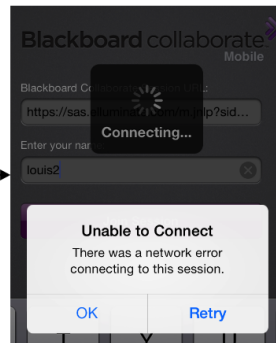

Link from Email

Input your desired display name and select the Log In button

If you are unable to connect Please ensure your network has port 2187 open

All images below are taken from an iPad, iPhone and devices with smaller screens may look slightly different.
