

Collaborations

The nature of the field of robotics is to be collaborative and cross-disciplinary. Research in a team environment offers chances to broaden one's understanding both in and out of his area of expertise.

Here are my frequent and active collaborators:

- **Stefano Carpin**, UC Merced, Computer Science Department
- **Mathias Kölsch**, NPS, Computer Science Department
- **Kevin Jones**, NPS, Mechanical & Aerospace Department
- **Vlad Dobrokhodov**, NPS, Mechanical & Aerospace Department
- **Michael Clement**, NPS, Computer Science Department
- **Kyle Lin**, NPS, Operations Research Department
- **Michael Atkinson**, NPS, Operations Research Department
- **Kanna Rajan**, MBARI, Principal Researcher for Autonomy
- **Rachel Silvestrini**, NPS, Operations Research Department
- **Tom Wettergren**, Navy Undersea Warfare Command
- **Jonathan DeSena**, JHU-Applied Physics Laboratory
- **Andrew Newman**, JHU-Applied Physics Laboratory
