

# Getting Started - NPS Wiki Version 5

## What's New With Confluence 5?

Confluence 5.0 introduces significant changes to the user experience:

- A new way of creating content
- More options in the header
- New sidebar
- A new look and feel across your Wiki Space
- [Read more...](#)

## How Will This Affect My Wiki Space?

There may be themes, plugins, and macros used in your Wiki Space that will not be supported by version 5 of the NPS Enterprise Wiki. Please take out the time to investigate your space content to see what you might need to change prior to the upgrade.

### Themes

Version 5 does not support the Easy Reader theme. If your Wiki Space currently uses the Easy Reader theme, your site and the spaces that use the theme will be automatically transferred to the default theme upon upgrade. You should check your Wiki Space(s) to see if you are utilizing the Easy Reader Theme. You might want to select another theme and update your Wiki Space accordingly. See the Plugins section below for more information.

### Plugins

There are many plugins that have been installed to provide greater flexibility and ease of use with your Wiki experience. This [Plugin Compatibility Chart](#) will help you keep abreast of how upgrades will affect your Wiki content in the future. If you find that a plugin you are using will not be compatible with a future upgrade, you will want to change your Wiki content accordingly.

### Macros

We use macros many times to help us format our wiki content. This [Macro Compatibility Chart](#) will help you recognize how upgrades will affect your Wiki content. If you find that a macro you are using will not be compatible with a future upgrade, you will want to change your content accordingly.

Please note that any themes, plugins, or macros installed for use by the Wiki Administrators are not guaranteed to work upon future product upgrades, as these items may be developed by third-party vendors and not by Atlassian, the creators of Confluence.

If you find that you need assistance with making your current wiki content compatible with the upcoming version, please write to [webmaster@nps.edu](mailto:webmaster@nps.edu).

## How Do I Get a Jump Start on Training?

### On-line Documentation

Atlassian, the creators of Confluence, has a great [knowledge base](#) to help you get started.

### Video Demos & Tutorials

Looking for a quick overview of the new features to come? Take a look at the [video demonstrations](#) of Confluence 5 features! If you need step by step instructions on using Confluence, Atlassian has a [YouTube channel](#) with tutorials and demos. You can also perform a search for detailed instructions on the web.

### In-Person Training

If you or your team need some face-to-face instruction on how to use NPS Wiki Version 5, just e-mail [webmaster@nps.edu](mailto:webmaster@nps.edu).

## Questions or Concerns?

Please email [webmaster@nps.edu](mailto:webmaster@nps.edu) for help.
