

Connect to Collaborate with Android

Follow the steps below to connect to a Collaborate session with a mobile device running Google's Android operating system.

Limitations

Only session participants should use the Android app as not all Moderator functionality is available.

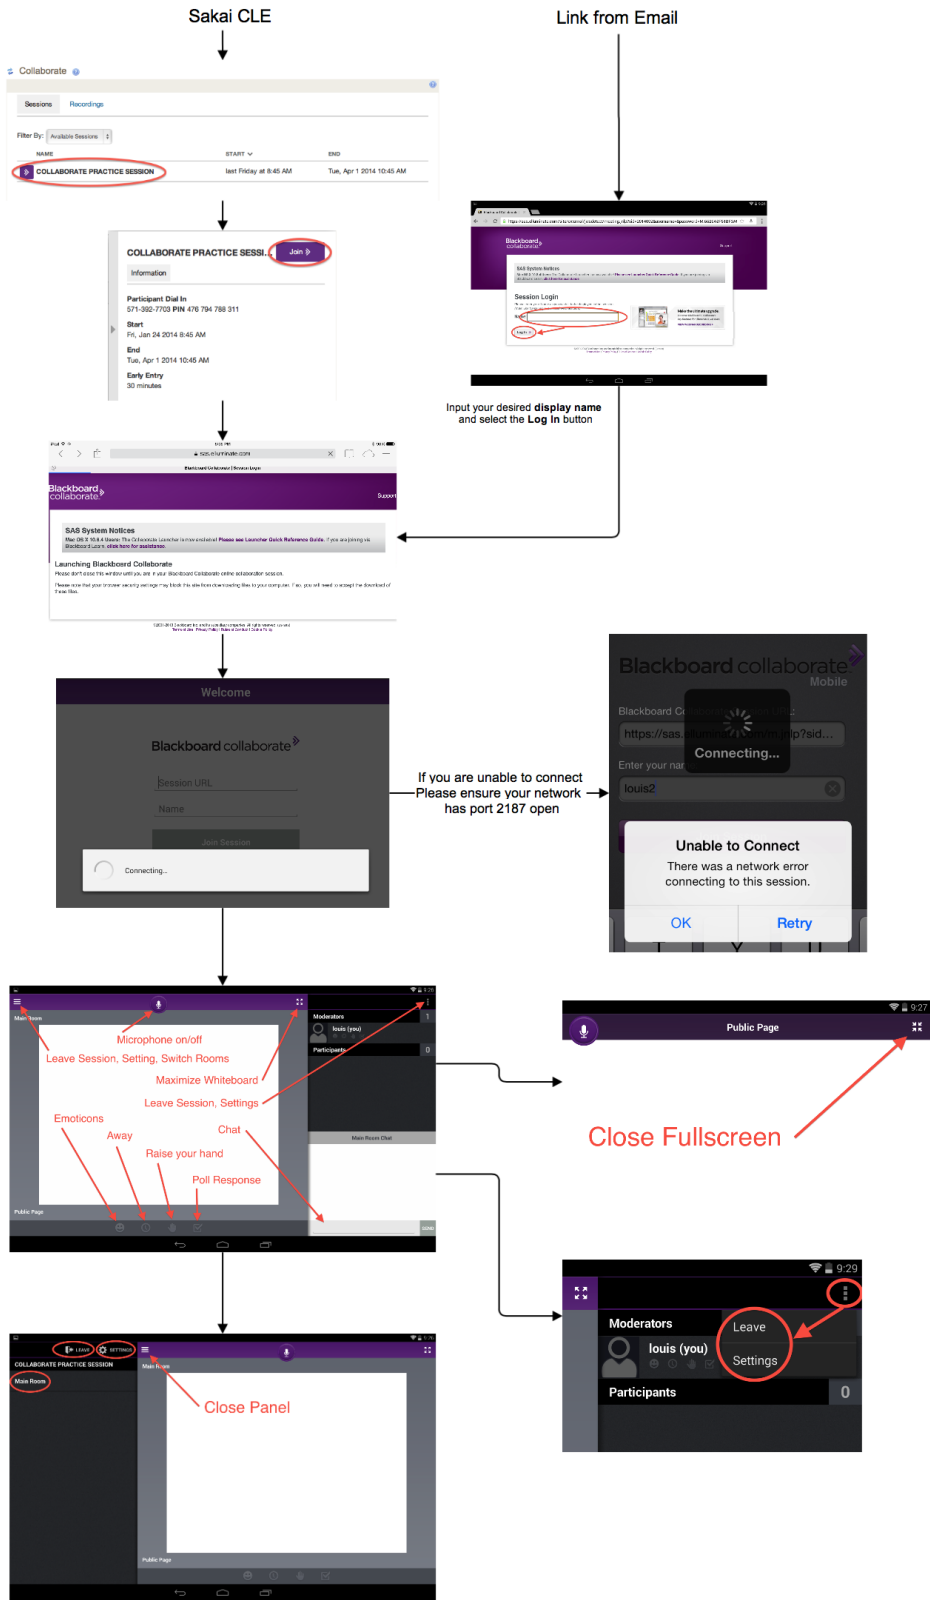

Collaborate Recordings will not play on Android devices. Please watch recordings using a computer with Java installed.

Download the App

if you have not already done so, Download the [Blackboard Collaborate Mobile app from the Google Play Store](#)

Testing

You can test your connection at any time by attempting to connect to the [Collaborate Always On session](#).

Images were taken from an Android tablet. Interface on an Android device with a smaller screen might be slightly different.
