Start a Zoom Meeting without Logging into the Zoom App

Did you know that if you are stuck and can't get logged into the Zoom for Gov desktop client, you can still run a meeting? Here are your steps for that.

**Note that when you start a meeting this way, you won't be able to access or start your virtual backgrounds.**

1. Navigate to zoomgov.com on a browser.
2. Log into your ZfG account.
3. Start meeting.
4. Click to choose "Launch zoom.us.app" when the dialog window pops open.
5. Your Zoom meeting will start with you as the Host.

Your browser does not support the HTML5 video element.
